

## ***Pace the House – Chase the Cat Play the Game – Focus and Aim***

### **The FF walker is for playful interaction and mobility indoor and outdoor on even ground.**

FF is a very responsive and stable walker for users relying more on legs and body than arm function.

Your posture is optimized for dynamic balance and point of force centred so that it is easy to manoeuvre the FF. Support parts are carefully fitted around your body to maximize your active balance and movements, so that you have strength for walking and control when turning in narrow places.

The slight tapered front makes turning and passing through doorways easy. High quality wheels, frame and support parts enable you to use your full potential.

#### **Where to use FF**

- At home.
- Indoor at kindergarten, school, care centre and outside on even ground.
- Shopping centres, gym, amusement parks.

Less strong or very spastic persons may be independent indoor but need assistance outside. On uneven or hilly ground a push pole can be used for assistance. Stronger persons with good strength and coordination can get around outside on solid and reasonable even ground independently.

*Get up and go*

*No more talking over your head*

*Meet at eye to eye*

*Dance or play with friends*

*Choose an active life*

#### **FF is a great choice if you:**

- Want to be mobile.
- Find it easier to control leg than arm movements.
- Find it hard to bend elbow to turn handlebar.
- Have athetoid movement pattern.
- Do not really have eye – hand coordination or perception to plan the steering action of a hand steered walker.

## FF Features

- Sizes from app 3 years to adult. If the user walk "tip toe" – then add about 5 cm to leg length to find relevant saddle height.
- Large wheels and compact design secure stability and smooth maneuvering.
- Except size 0, all sizes have drop link of saddle section.
- Easy transfer on and off by use of drop link of saddle section.
- High quality parts secure long durability and versatile use.
- Durable & stabile design.
- United steering and power by legs and body.
- Rear wheel drum brake.
- Options of different ergonomic multi adjustable saddle and chest support system.
- Longer posts for saddle and body support can be supplied.
- Multi adjustable mountainbike handlebar with brake.
- Tool bag.
